SUJAY PAUL P

9384491422 | sujaypaul2711@gmail.com | linkedin.com/in/sujay-paul272006 | github.com/sujaypaul27

EDUCATION

R.M.D. Engineering College (Autonomous) 2024 – 2028 (Expected)
B.E. in Electronics and Communication Engineering | CGPA: 8.02 / 10 *Chennai, Tamil Nadu*
Sri Venkateshwara Matric Hr. Sec. School Grades 3 – 12

TECHNICAL SKILLS

Languages: Java, Python, C++, SQL, JavaScript, HTML, CSS
Frameworks & Libraries: React, Spring Boot, Vite, REST APIs
Databases: SQL, H2 Database
Developer Tools: Git, GitHub, Maven, Postman, Swagger, IntelliJ IDEA, VS Code
Cloud & Platforms: Oracle Cloud Infrastructure (OCI), Zoho Catalyst
Areas of Interest: Software Development, Generative AI & LLMs, API Testing, Cloud Computing, IoT

EXPERIENCE

Java Full-Stack Intern (Virtual Internship) Jul 2026 – Aug 2026
Infosys Springboard *Remote*

- Built the React frontend for SkillSphere Nexus, an employee skill-management and learning platform with separate HR and employee workflows, and integrated it with Java Spring Boot REST APIs.
- Implemented employee skill management, learning analytics and certification-related features, including skill verification, assessment tracking and certificate expiry tracking.
- Worked with an H2 database for data persistence and tested REST endpoints using Postman and Swagger.
- Organized the application into milestone-based modules, used Git and GitHub for version control, and prepared project documentation.

PROJECTS

ShiftGuard | *React, Vite, Java, Spring Boot, REST APIs, SSE, Zoho Catalyst* 2026

- Developed a workforce shift-scheduling application with a React (Vite) frontend and a Java Spring Boot backend connected through REST APIs.
- Worked on real-time event updates using Server-Sent Events, simulated dispatch operations with dispatch logs, and a simulated payment-link API integration.
- Configured cloud deployment on Zoho Catalyst and debugged CORS errors, HTTP 403 responses and Data Store limitations.

Autonomous Fire Fighting Robot | *Arduino Uno, L298N, Flame Sensors, Embedded Systems* Team Project

- Contributed to a prototype that detects fire using three flame sensors, drives DC motors through an L298N motor driver and activates a water pump to spray water.
- Handled hardware assembly and circuit connections, and coordinated task allocation and progress tracking across the team.
- Prepared the technical explanation of the sensor-to-actuator working for the project presentation.

Automatic Waste Segregation Bin | *IoT, IR Sensors, Servo Motors* Personal Project

- Designed an IoT-based smart waste segregation system that detects and sorts dry, wet and metal waste using sensors.
- Implemented servo motors and IR sensors for automatic bin rotation and classification.

CERTIFICATIONS

Oracle Cloud Infrastructure (OCI) AI Foundations Associate – Oracle
Oracle Cloud Infrastructure (OCI) Generative AI Professional – Oracle
